THE TREASURY.

Washington, D. C., July 2.—Special.—John M. Comes, chief of the Warrant and Issue Committee, to the credit of the ordinary current of the debt statement, says: "The total year has closed with a most favorable exhibit that was anticipated, the reduction to the public debt for the ending June $15,000,000. The reduction for the last month is more than the aggregate made in a single month for the past several months of business. There were many conditions which, if the result was unfavorable, would have operated against the showing, but as the result was so favorable, it is the more creditable to the executive and the Treasury of some particular mention should be made. The Treasury is regarded as a liability of $346,681,016, which was the amount of the outstanding debt at the beginning of the fiscal year. The amount of the disbursements of the Treasury, including the sinking fund, was $265,000,000, which was the amount of the Treasury receipts, the receipts exceeding the disbursements by $15,000,000. The Treasury, under the law, is required to keep in the vaults $100,000,000 of coin and bullion, and of this amount $50,000,000 was held against the United States notes, and $50,000,000 against the national bank deposits. This $100,000,000 was held in addition to the amount required to meet the current demands. There was also held $10,000,000 of fractional currency, which was received from the Treasurer of the United States, and which was not included in the $100,000,000 mentioned. The amount of the Treasury receipts from customs during the year was $195,000,000, and from internal revenue $146,000,000. The receipts from miscellaneous sources were $24,000,000. The Secretary of the Treasury has directed that the amount of the surplus revenue be applied to the purchase of bonds, and the Secretary has issued a circular to that effect. The circular is as follows:
